WHAT I SAW

I asked Google and Bing about GEO, AEO and AI visibility

how to know if chatgpt mentions my brand

Google: no suggestions

The question a brand needs answered most does not get a single suggestion.

Autocomplete, signed out, no history, 28 October 2026.

Google suggestions

For “how to know if ChatGPT mentions my brand”.

how to know if chatgpt mentions my brand

No suggestions

Bing splits the question in two

YOU TYPED

how to know if chatgpt mentions my brand

BING COMPLETES WITH

how to monitor brand mentions in chatgpt

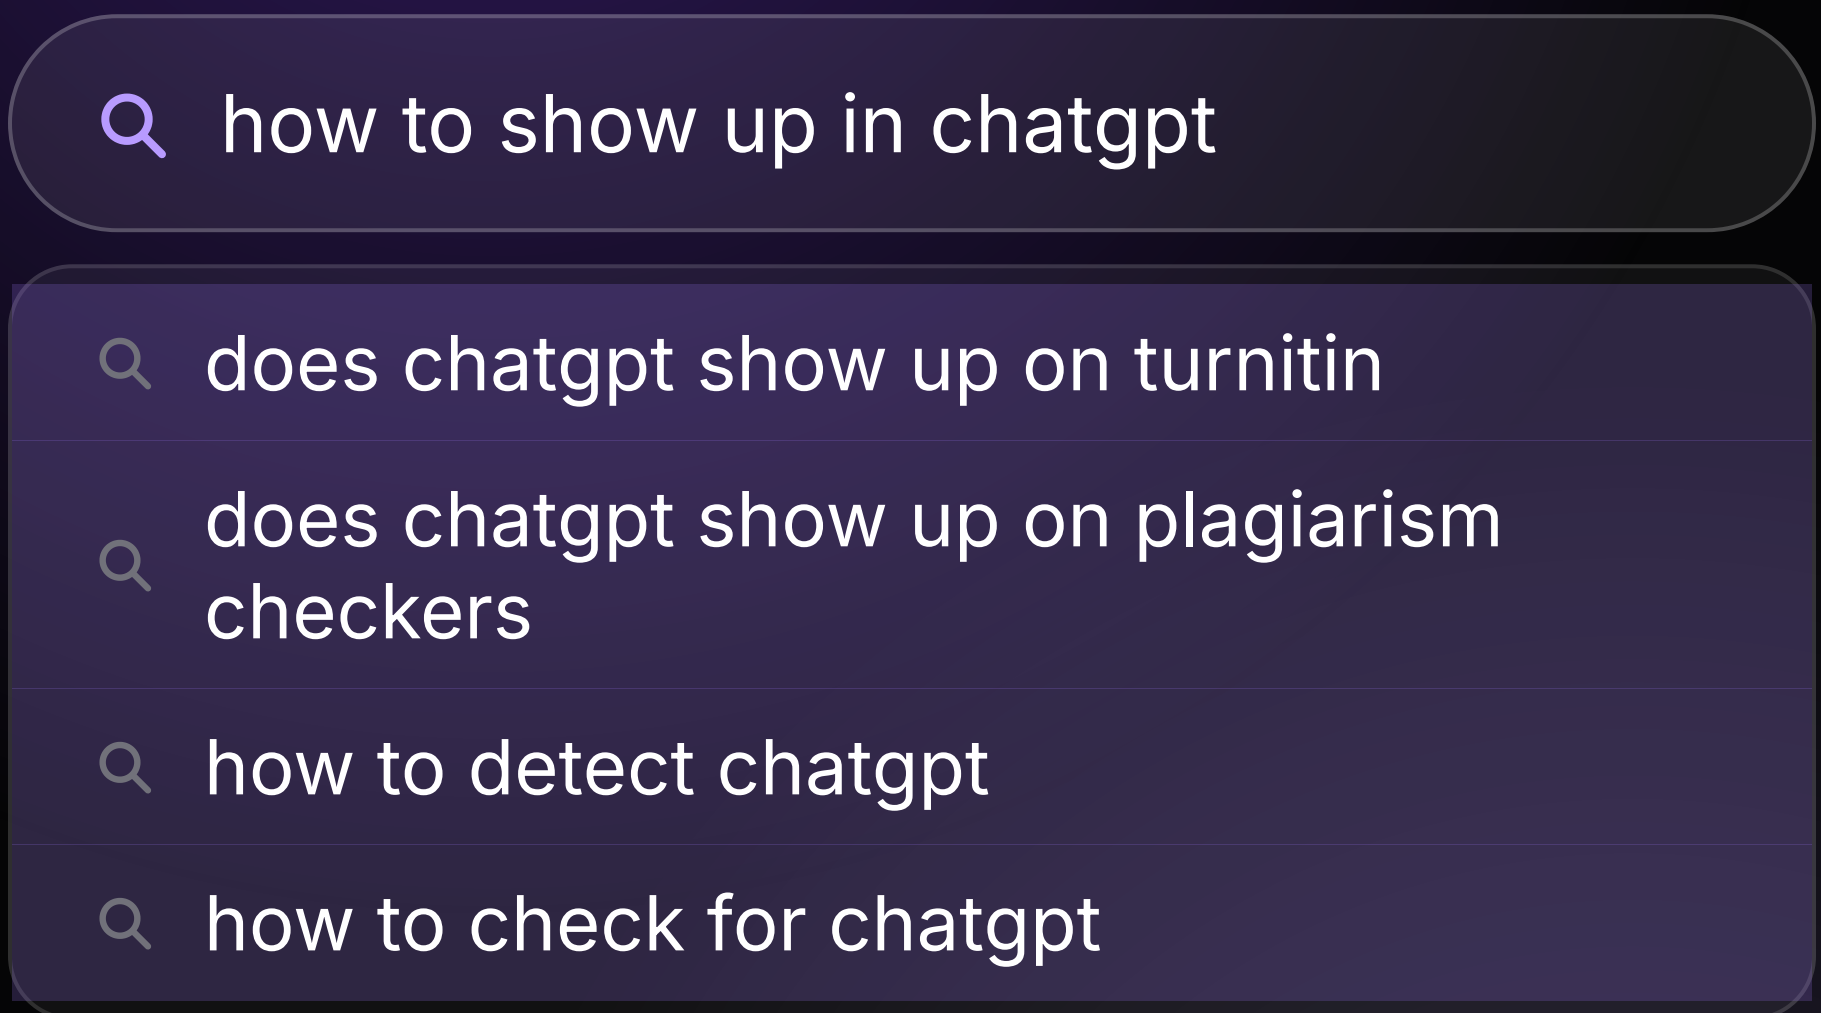

how to see brand visibility in chatgpt

how to know if someone used chatgpt

can companies tell if you use chatgpt

Half brand monitoring, half detecting AI-written text.

Ask Bing how to show up in ChatGPT: Turnitin

Google completes it as results, searches and “a winning aeo playbook.”

To a search engine, GEO is geography

geocaching

geography

geometry

geology

AEO already got its own: “aeo vs seo” and “aeo and geo.”

Some words are already claimed

GOOGLE US

ai visibility

- tools
- score
- checker
- tracker
- agency

GOOGLE US

what is geo

- geocaching
- geography
- geometry

Words with their own meaning get found. GEO still means geography.

Answers to the ones search engines do not settle

AEO or GEO?

Close to the same task: getting an AI to name or cite you. What matters is what you measure.

How do I show up in ChatGPT?

There is no list to climb. Its crawler has to get in, and your page should answer first.

Does ChatGPT mention my brand?

Repeat your customer’s question and save each answer with its date. One run proves nothing.

This week, four steps

1. **Write it like your customer**
   Your service in their words, not your industry's.

2. **Type it into Google and Bing**
   Note what they complete. If it is something else, your word means something else.

3. **Answer it on one page**
   In the first lines, in their words.

4. **Check again in a month**
   It moves: a Mexico suggestion from 10 October was gone on 28 October.

THE LIMIT

Autocomplete is not search volume

It shows a question exists

It does not say how many ask it

What does Google complete when you type the most important question for your business?

It changes with place and time, even with no sign-in or history. Sources: Google and Bing autocomplete with US and Mexico parameters (28 October 2026); SparkToro and Gumshoe.ai (28 January 2026); OpenAI bots documentation.
